

GOING GREEN?

The kind of bulbs, the type of lighting, the kind of power we use, the heightened interest in the environment all lead to reduced energy consumption. This is what the marketplace is demanding. *Are you prepared?*

With our extensive line of fluorescent; pulse-start metal halide lighting; weatherproof fixtures, boxes and covers; and a complete line of steel and die-cast fittings –

We're poised to be your "Green Supplier" for 2008 and beyond.
